

I am asking that you do NOT allow the lower power FM (LPFM) stations to take priority over the current FM translator service. As I travel (frequently), I am able to enjoy several radio stations, including K-LOVE stations because of their ability to use translators. K-LOVE serves the public interest by providing upbeat, quality family broadcasting. Replacing with other formats, which are already in abundance on the airwaves, would only serve to degrade public options in radio.

Thank you.
